What is the best time to visit Uganda?

You may now wonder about what really is the best time to visit Uganda, and we are here to answer this query while you plan the trip.

In most parts of the region, one can expect an average of 1,000-2,000 millimetres of rainfall,

however this may vary throughout the region. These rains generally occur between the months of April and June, and they are back again shortly from October to December. Around this time it rains heavily, although it is quickly followed by bright sunny weather.

So if you are a pluviophile (someone who loves the rains) then Uganda should be on your travel bucket list.

Infact you wouldn't sweat much since the humidity is quite low in most parts of the country. But as we all know nature is full of miracles, due to high water evaporation (around 75-80%) in the basin of Lake Victoria, heavy showers with high humidity can be expected.

MESSAGE FROM OUR SENIOR

“

From my journey, I have learned to remain focused and active to achieve our goals. We are working in an organization where the employees are empowered and pushed to grow, learn, and evolve.

As we are working as a team, we need to collaborate with each other to get ahead and succeed.

Let's focus on energizing and inspiring each other to achieve performance goals to support the growth of the company.

Last, but not least, I want to thank each and everyone for their uncanny support.
